NOTES TO THE FINANCIAL STATEMENTS

For the Quarters ended March 31, 2016 and 2015

# 1. NATURE AND CONTINUANCE OF OPERATIONS

Banyan Gold Corp. (the "Company"), was incorporated as Banyan Coast Capital Corp. by a Certificate of Incorporation issued pursuant to the provisions of the Alberta Business Corporations Act ("ABCA") on July 26, 2010. The address of the Company's head office is 303 - 80 Richmond Street West, Toronto, Ontario, M5H 2A4. These financial statements were approved and authorized for issuance by the Board of Directors on February 25<sup>th</sup>, 2016.

The Company commenced trading on January 27, 2011, and trades under the symbol BYN.

On February 15, 2013 the Company completed its qualifying transaction by acquiring the Hyland Gold Project and raised \$500,000 by way of a non-brokered private placement.

These financial statements are presented on a going concern basis, which assumes the Company will continue to realize its assets and discharge its liabilities in the normal course of operations.

The Company does not generate cash flows from operations and has therefore relied principally on the issuance of equity securities to finance its operation activities to the extent that such instruments are issuable under terms acceptable to the Company.

If future financing is unavailable, the Company may not be able to meet its ongoing obligations, in which case the realizable values of its assets may decline materially from current estimates. The financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue operations.

# 2. BASIS OF PRESENTATION

These financial statements, including comparatives have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS"). The financial statements have been prepared on a historical costs basis, except for financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their fair value. In addition these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could results in a material adjustment to the carry amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- i) the recoverability of receivables which are included in the statements of financial position;
- ii) the inputs used in accounting for stock-based compensation expense, which are included in the statement of operations;
- iii) recoverability of future income tax asset;
- iv) recoverability of exploration and evaluation expense asset;
- v) the valuation of the rehabilitation provision; and
- vi) the valuation of share-based payments transactions.

Fair value estimates are made at the reporting date, based on relevant market information and other information about the financial instruments. Fair values are determined directly by reference to published price quotations in an active market, when available, or by using a valuation technique that uses inputs observed from the markets.

The Company classifies its fair value measurements within a fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

Level 1 - Unadjusted quoted prices at the measurement date for identical assets or liabilities in active markets.

Level 2 - Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 - Significant unobservable inputs which are supported by little or no market activity.

All of the Company's cash and cash equivalents are assessed to be in Level 1.

The fair market value of the Company's receivables, payables and accruals approximate their carrying amount due to their short-term nature.

# NOTES TO THE FINANCIAL STATEMENTS

For the Quarters ended March 31, 2016 and 2015

# 9. FINANCIAL AND CAPITAL RISK MANAGEMENT (Continued)

### a) Credit Risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada. Management believes that the credit risk with respect to receivables is remote.

### b) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient capital to meet liabilities when due after taking into account the Company's holdings of cash that might be raised from equity financings. As at March 31, 2016, the Company had a cash balance of \$80,293 (2015 - \$236,861) and current liabilities of \$12,781 (2015 - \$16,312). All of the Company's accounts payable and accrued liabilities have contractual maturities of less than 60 days and are subject to normal trade terms. The Company has working capital of \$99,175 (2015 - \$443,996). A financing will be required to cover the expected short and long term cash requirements.

### c) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not believe a change by 1% in interest rate will have a significant impact on the fair value of its cash equivalents.

### d) Foreign Currency Risk

The Company's reporting currency is in Canadian dollars and major transactions are denominated in Canadian dollars. Therefore the Company's currency risk is not significant.

### **Capital Disclosures**

The Company manages its capital, consisting of shareholders' equity, in a manner consistent with the risk characteristics of the assets it holds. All sources of financing are analyzed by management and approved by the board of directors.

The Company's objectives when managing capital are:

- a) to safeguard the Company's ability to continue as a going concern; and
- b) to facilitate potential acquisitions.

The Company is meeting its objective of managing capital through its detailed review and performance of due diligence on all potential acquisitions, preparing short-term and long-term cash flow analysis to ensure an adequate amount of liquidity and monthly review of financial results. As disclosed previously, there are restrictions on the use of cash.

There were no changes in the Company's approach to capital management during the period ended March 31, 2016.

# **11. LOSS PER SHARE**

# **12. SUBSEQUENT EVENTS**

There are no reportable subsequent events.
